EXPERIENCE

Intern, Self-Initiated Projects

Aug, 2023 - Apr, 2024

During my learning journey, I worked on personal projects and connected with various individuals to improve my skills. I learned web technologies from the scratch. One of the projects I developed was a shopping store web app using React, Redux, and Tailwind CSS.

Fronted Developer Intern
Anamnagar, kathmandu

Digital Pravidhi
Oct, 2024 - Dec, 2024

- Built an attractive landing page that boosted lead generation by 60%.
- Worked with other developers on both the frontend and backend parts of projects.
- Guided and mentored interns to help them grow their skills.
- Worked on different SaaS projects and communicated with clients to meet their needs.
- Took part in the full development process, from planning and coding to testing and launching.

EDUCATION

B.Sc. (Hons.) Information Technology
Kathmandu

Lord Buddha Education Foundation (LBEF)
Oct, 2022 - Present

High School, Biology
Bhaktapur

Sainik Awasiya Mahavidyalaya
Mar, 2020 - Apr, 2022

PROJECTS

Ecommerce Project

- Description: Designed and developed a fully functional e-commerce platform using React.
- Key Features:
  - Integrated product listings, shopping cart, and checkout functionalities.
  - Applied responsive design principles for an optimal user experience across all device.
  - Gained hands-on experience with React state management and component structuring.
- What I learned:
  -
  - Got real experience with React.js, improving my skills in managing state and building clean, user-friendly designs.
  - Learned how to break down complex problems into smaller tasks and solve them effectively.
  - Developed a better understanding of responsive design to make sure the app works well on all devices.
  - Gained confidence in debugging and optimizing code for better performance.
  - Improved my ability to organize and plan projects, ensuring they were completed on time

HealthCamp

Description:
Developed a web app to simplify the management of health camps by handling patient registrations, scheduling, and data tracking.

Key Features:
- Automated patient registration and appointment scheduling.
- User-friendly interface built with React for smooth navigation.

- Backend integration to securely handle patient data.

What I Learned:
- Improved skills in React.js, focusing on building clean and interactive user interfaces.
- Gained experience in backend integration and managing APIs securely.
- Learned how to handle real-world challenges like organizing data and optimizing app performance.
- Strengthened my ability to work on both the frontend and backend of a project.

Scan Menu

Description:
Built a SaaS platform that allows businesses, such as restaurants, to offer digital menus through QR codes, providing customers with a great ordering experience.

Key Features:
- QR code generation for quick access to digital menus.
- Easy-to-use interface for both customers and restaurant owners.
- Real-time menu updates and order tracking.

What I Learned:
- Gained real experience in building SaaS applications, focusing on scalability and user experience.
- Learned how to manage complex state in React, improving data flows and is shared across components.
- Learned to manage large-scale state management using tools like Context API, Redux, Zustand and custom hooks.
- Improved my understanding of how to deliver a smooth customer experience in web applications.

SKILLS

React, MongoDB(Mongoose) / Node JS (Express Js), Nest JS, Javascript, Docker, TypeScript, Blockchain, Web3.js, Solidity, Material UI, AntDesign, TailwindCSS, Chakra UI, MySQL, PostgresSQL, Zustand,TanstackQuery

LANGUAGE

Nepali, English, Hindi
